cubicle system

For a truly luxurious cubicle setting, the ClearSPOT cubicle system is the perfect choice. ClearSPOT is constructed on clear tempered glass with ceramic frit or laminated finish door, divider and pilaster. It can also be used with various colours and texture compact panels. The adjustable height support legs, complete with friction clamp allows for varied floor clearances. The door and pilasters are generated prominent effect, with the setting back off the overhead stabilizing rail, giving an almost frameless appearance system.

cubicle system

The small number of accessories and profiles of this range, enables fast and efficient installation. Using 19mm compact panels for the cubicle door and pilaster, integrated with sturdy stainless steel footing of its floor anchored system, make NatureSPOT more robust. The absence of head rail, gives an uninterrupted view of the doors and pilasters, seen as the array of beautiful colours of SPOT compact panel.

ShineSPOT stainless steel fittings are concealed to deter vandals from tampering the system. Noise generated from the constant opening and closing door is silenced with the mohair strip attached to the pilaster. These benefits are also supported with the extremely durable and water resistant materials resulting in heavy duty toilet cubicle system.
